

Northern Lehigh Educational Foundation Raises Funds for New Science Lab

The Northern Lehigh Educational Foundation proudly presents this display of desks, which will be on view to the public in various venues throughout the Lehigh Valley in order to promote the Foundation's mission to raise funds for the construction of The Herman P. Snyder Science Lab for Advanced Studies at the Northern Lehigh High School.

Old desks were donated to the Foundation by The Northern Lehigh School District and given to the Painting II class at the Northern Lehigh High School. This labor of love and creative student talent is representative of 3 months of hard work and dedication by high school students under direction of Mrs. Marianne Mattiolla. Visit our website at www.nlsdef.org and learn how you can own one of these desks.

Founded in 1999, the Northern Lehigh Educational Foundation has been raising funds to supplement educational programs in the Northern Lehigh School District community.
